CSAs are based on the seasonal availability of food. Not all boxes contain the same produce nor the same amount each week. **Definitions:** **Certified Organic** refers to produce that has been certified as organically grown. **Chemical-free** means the farm uses bio-sustaining growing methods, free of any chemical pesticides or fertilizers and is not certified under the National Organic Program. **Partial Shares** means the farm offers smaller boxes or every-other week shares for smaller families or appetites. **Storage share** is a box of produce that includes root vegetables (potatoes, onions etc) that are harvested at the end of the season and have a longer shelf life.
